FROG BOG™

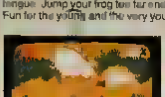
FOR COLOR TV VIEWING ONLY

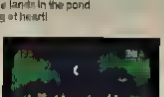
PRINTED IN HONG KONG

This package contains one Frog Bog™ cartridge, two controller overlays and playing instructions.

FROG BOG™ cartridge

Rival croakers wait on their lilly pads for a live one. Flying critters of assorted speeds & shapes float by at random, anywhere on your screen. Object of the game is to make a frog jump and catch insects with his flashing tongue. Jump your frog too far and he lands in the pond. Fun for the young and the very young at heart!





Use [illegible] to move your frog as he swivels & jumps among lily pads scoring bugs. When frog's asleep game is over!

Use [illegible] to move your frog as he continues seeking out his next bug. Game ends when frogs sleep.

- For one or two players.
- Three skill levels. Easy way makes frog jump in the same path every time. Hard level gives you directional control plus control of the frog's tongue.
- Skill levels can be changed any time during the game. And both players do not have to use same skill level. Adult can give little kids a break!
- Extra points for harder to catch critters. Running score totals displayed.
- Sound effects include night critters, daytime wind, hearts swallowing, sound when insects are caught.

[illegible] game play by Intellivision.
[illegible] you want [illegible] Intellivision.
Mattel Electronics, P.O. Box 2000, [illegible]
